Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 1-8 in the reply filed on 04/14/09 is acknowledged.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- in claim 2, it is not clear how said image would be able to measure the currently printed image, as well as, exactly what is being measured.
- In claim 8, it is not clear what "said control marks" are in relation to claim 1.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Gibson et al. (5,956,055).

Gibson et al teach an inkjet printing apparatus comprising:

Claim 1:

- a substrate and a mechanism for moving the substrate in first direction (figure 1, paper moving in direction 16), a printhead and a mechanism for moving the printhead in second direction (figure 1, head 10 moving in direction 24) , image position detecting means for detecting image on substrate position, and a control computer (figure 3 teaches skewed columns 38 and 40 are detected to be offset), characterized in that errors in said image and substrate positions are corrected by adapting the geometry and position of the currently printed swath to the geometry and position of the adjacent earlier printed image swath (figure 4 teaches dots in column 40 are printed to adapt to the way drops were deposited in column 38).

Claim 3:

- characterized in that the control computer calculates the deviation of the current image on substrate position relative to the previous swath position and generates a correction value (figure 4).

Claim 8:

- printed by ink consisting of one of a group of visible ink, invisible ink or magnetic (figure 1 teaches inkjet inks).

Allowable Subject Matter

Claims 4-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lamson D. Nguyen whose telephone number is 571-272-2259. The examiner can normally be reached on 8-5.
